

**DO NO HARM**  
**KNOW YOUR POWER**

**Empowering clinicians to make the best choices**

## What is causing harms in the Healthcare Industry?

**Time pressures** and **financial demands** on the Healthcare system have significantly increased. Due to this, clinicians have been compelled to sometimes make clinical decisions which have not always led to the best outcome for the client. These challenges have adversely affected the patients, leading to an increase in harms.

Other contributing factors include: commoditisation of equipment, complex standards, separate budgets, lack of joined-up thinking, and a lack of clinical expertise in the procurement processes.

## As clinicians, you have the power to make a change!

You have the power to:

- Say no to cheap, untested equipment
- Bring clinical recommendation back into buying processes
- Learn about standards and apply these to prescription processes
- Consult with your colleagues in the community or the acute to ensure integrated care management

**Our aim is to empower you to make the best decisions to ensure the best possible outcome for the client.** We are working with various bodies and industry experts to make information on standards, equipment, and best practice guidelines accessible to you. Join our campaign and speak to us to find out more!
